

Session 3: what the groups said

7 groups · about 90 notes · bar = groups raising the idea

Cross-cutting

Documentation and metadata — all 7 groups

Common standards and formats — 5

Public funding and credit for maintenance — 5

One central entry point — 4

Models for everyone	Data we can actually use	Finding what Europe already has	Software as infrastructure	What else? Open questions
Documented limits, units, uncertainty 5/7	Missing metadata and processing info 6/7	Central catalogue or webpage 4/7	Agencies and EU fund maintenance 4/7	• Should funders replace publishers?
Easy UI, tutorials, plug-and-play demo 4/7	Readers, scripts, quicklooks 5/7	Advertise: workshops, EGU, tutorials 4/7	Credit software in papers 2/7	• Who are the users?
Validation, tests, reference data 3/7	Common formats (FITS, CDF, SunPy) 4/7	Open access, lower first-access barrier 2/7	Dedicated engineers or community 2/7	• How to maintain code for a decade?
Contact point and user support 3/7	Quality flags and checks 2/7	Standards and a common index 2/7	European-level coordination 1/7	• Service-driven or not?
In return: feedback, credit, budget 3/7	Access: embargo, data gaps 2/7			• AI has changed the picture

Suggested next step
Minimum documentation checklist for models and datasets: units, limits, flags, processing.

Suggested next step
One agreed format and reader set with quicklooks, behind a queryable central catalogue.

Suggested next step
Make maintenance a fundable proposal line and cite software in papers.

Source: HIE Session 3 whiteboard, 7 groups. Counts are groups that raised the idea at least once; next steps are suggestions, not group statements.
